Designed in association with and patented by Italian company Accossato.

Features include:

- Unique variable section design offers up to 15% less vibration and 10% more flex than many other tapered handlebars
- Manufactured from Ergal 7075 Aluminium
- Shot peened finish
- Position marking to assist with handlebar setup
- Homologated to the strict TUV European standard
- Available in a range of bends and anodised colours. (see chart on below)
- Superior clamp fit for Barkbusters as the clamp area is parallel, not tapered.
